

THINK YOU CAN SAVE THE PLANET?

PROVE IT THIS FALL!

FALL 2017 NEW COURSE

CSUSB Department of Geography and Environmental Studies

COURSE TITLE: Environmental Sustainability in the 21st Century (GEOG 390)

- This course will explore how human activities can be altered to meet the needs of both current and future generations to ensure long-term environmental sustainability of the planet.
- Topics include sustainable approaches to agricultural production, water resources, development and energy across varying geographical scales including the CSUSB campus and surrounding communities.
- Interactive activities will allow students to gain a deeper understand of how their actions and those of others may be altered to sustain the primary functions of the Earth's systems at a local and regional scale.

****Course Can Be Counted for the Upper Division Electives for all of Our Majors.**
